

“Participative Learning & Collaborative Learning Mechanism”

Participative Learning:-

The Participatory learning environment can also refer to specific forms of advanced learning environments that are based on both situated and constructionist principles.

Participative learning techniques in E& TC Dept. :-

- Activity profile
- Approach members constructively
- Brainstorming
- Case studies
- Community surveys
- Describing visual images
- Field visits and excursions

Collaborative Learning :-

It is an approach to teaching and learning that involves groups of students working together to solve a problem, complete a task, or create a product during this intellectual interactions, the learner creates a framework and meaning to the discourse.

We implemented Collaborative Learning for TE E& TC class room by making group of three to four students and allotted a particular topic of the subject, giving a specific period of time, they have to analyze the concept, discuss and to present in the classroom this improves role playing, communication skills, their technical knowledge about the given topics, confidence level etc.

We achieved success in implementing Collaborative Learning in our E& TC department and got positive feedback from the students.

Champion: Prof. M. R. Bachute , Prof. Pratibha Reddy, Prof. A.A. Deshmukh

Commandos: Ms. Yogita Dhamdhare (TE E&TC)

Ms. Shubhangi bhosale (TE E&TC)
